Honourable Sir,

The Public Health Order restrictions are inexorably progressing towards the chaos of armed resistance. I believe it is of critical importance to the people of Saskatchewan we meet. We are in this together. So, let us amicably work together to have all restrictions rolled back and repealed. Time is of the essence. The stress and strain being put on our neighbours is already past the point of being reasonably tolerated.

Since April 2020, our Freedom Alliance group has been raising public awareness of the science involved in the COVID events and government responses. This includes our over 2500 members and supporters participating in protests against the measures currently being used to combat the alleged Covid-19 Pandemic and control our daily activities.

We have allied with several other groups on many approaches. Members and supporters have submitted many emails, hundreds of phone calls, and larger public gatherings which have now been banned and fines received for continuing to have them.

I recently managed to facilitate a lawful peaceful protest that resonated with everyone in the province, including yourself. By this I am referring to the peaceful gathering on the public property outside Saqib Shahab, PHD's home.

Our Freedom Alliance council debated this action for months. At the end of our deliberations a volunteer, unaffiliated with Freedom Alliance, came forward who was willing to lead the lawful protest. I personally observed on-site the day of the visit.

The event was carefully planned, and cautiously executed. Conscious measures were taken to ensure the public sidewalk gathering was peaceful and lawful. It was not an open invite protest. Saqib Shahab's address is not yet widely shared. Those trusted people allowed to come were chosen as we knew under all circumstances they would be capable of remaining calm and peaceful. We brought 600 to the legislature in December. I easily could have facilitated hundreds coming to Saqib Shahab, PHD's neighbourhood.

You and I agree the sanctity of everyone's private home should be respected. Seeing you clearly and publicly state our private homes are sacrosanct gained our respect. You, I, and pretty much every resident of Saskatchewan agrees with this ethically correct stance.

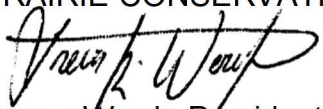

Recognizing that we agree on this point, I am hoping to move forward together on many difficult matters requiring direct discussion. One of the asks we wish to discuss is the ban on gatherings of five people in private homes. We feel this is something to be immediately removed as a pressure relief. It is unacceptable people protest in front of Saqib Shahab, PHD's home. It is equally unacceptable our government trespasses against our private homes and businesses. Issuance of fines may not be unlawful trespass. However, lawful or not, we are in agreement trespass on private homes and private business is ethically unacceptable in Saskatchewan.

You publicly stated if we have a problem with restriction measures to present our perspective directly to you. I am happy to do so. I suggest a private meet where you and I can talk bluntly. Each of us can bring a few close advisors. Let us amicably discuss these matters.

Perhaps we meet in the private room at one of our fine Regina restaurants? I leave the final choice of venue and cuisine to your discretion. Personally, I am partial to a good steak with baked French onion soup as the side dish.

Contact me at any time. My private cellular phone number is 204-880-6383.

Regards,
PRAIRIE CONSERVATIVE ALLIANCE
